TECHNICAL BULLETIN

BIO-TERGE

OIL AND GREASE DISPERSANT

**NON TOXIC * NON FLAMMABLE * BIODEGRADABLE
FORMULATED ESPECIALLY FOR OIL FIELD USE**

DESCRIPTION

BIO-TERGE is an exclusive formulation that chemically bonds with oil molecules and makes each molecule water soluble so that naturally occurring micro-organisms can break down the oil molecules and make them non-polluting and non-toxic. This scattering effect also brings the oil more quickly into contact with naturally occurring micro-organisms and speeds biodegradation of it. BIO-TERGE solubilizes hydrocarbon solvents and makes them non-flammable when properly dispersed in water in unconfined areas.

DIRECTIONS

BIO-TERGE may be used on any surface not harmed by water. It is recommended for cleaning drill floors, tanks, pipe, tools, stairways, and other work areas and leaves them clean and safe. It effectively removes oil base mud, mud deposits, drilling fluids, completion fluids, cuttings and other oily deposits. For spills or heavy oil deposits, spray on full strength and allow to soak for a few minutes. Flush solubilized oil away with high pressure water spray.

Spray on slicks and agitate to disperse the oil. Refer to material safety data sheet for other information.

CAUTION

Eye contact may cause irritation. Prolonged or repeated skin contact may cause dryness or chapping. May be harmful if swallowed. In case of eye contact, flush with large amounts of water. In case of skin contact, flush with water.

NOTICE

Mobile Solvent & Supply, Inc. products are safe and effective when used as directed. When using as a cleaner, always test a small area for adverse reaction. Since the manufacturer cannot control conditions or method of application, no warranty or liability beyond the replacement of defective product is offered.
