TECHNICAL BULLETIN

SHIP-SHAPE BILGE CLEANER CONCENTRATE

DESCRIPTION

SHIP-SHAPE is an exclusive formulation that chemically bonds with oil and grease molecules and makes each molecule water soluble. Mild agitation keeps oil and grease suspended and keeps them from floating to the surface. SHIP-SHAPE is water based and contains no hydrocarbon solvents or other combustible materials. It is safer to use than the combustible solvent blends that it so effectively replaces.

DIRECTIONS

Safe and economical, SHIP-SHAPE may be used on any surface not harmed by water. It will remove oils, greases, dirt and most other soils normally found in bilges and engine rooms.

Bilge Cleaning: Just add a few gallons to the bilge and let wave action mix SHIP-SHAPE into the water and oil in the bilge. Flush away with water spray and pump into holding container for proper disposal of oily waste.

Degreasing Engines: Dilute 1 part cleaner with 10 parts water or more depending on the job to be done and the cleaning method to be used.

CAUTION

Eye contact may cause irritation. Prolonged or repeated skin contact may cause dryness and chapping. May be harmful if swallowed. In case of eye contact, flush with water for at least 15 minutes and get medical aid if needed. In case of skin contact, flush with water. If swallowed, DO NOT INDUCE VOMITING, drink large amounts of water to dilute and get medical aid.

WARRANTY

Mobile Solvent & Supply, Inc. products are safe and effective when used as directed. When using as a cleaner, always test a small area for adverse reaction. Since the manufacturer cannot control conditions or method of application, no warranty or liability beyond replacement of defective product is offered.
